

STEM FIELD TRIPS

In person, on the golf course!

Educate, engage and inspire your students with a one-of-a-kind STEM learning, environmental science and career exploration field trip to your local golf course. First Green brings students out of the classroom to a local golf course for a fun, hands-on field trip to explore the living laboratory that is the golf course. Career professionals will lead stations featuring the math, engineering, technology and environmental and earth science practiced each day. If you've ever wanted to reinforce STEM skills while on a unique field trip – here's your opportunity! Students will engage in a variety of real-world applications to what you teach in the classroom.

Choose from a variety of hands-on STEM learning stations. Work with the golf course superintendent to tailor the field trip to meet your students interests and needs.

2-Hour Field Trip

- Includes **3** STEM learning stations
- Plus, a fun golf activity
- Student Packs for each child
- No charge for field trip

3-Hour Field Trip

- Includes **4** STEM learning stations
- Plus, a fun golf activity
- Student Packs for each child
- No charge for the field trip

Each learning station is led by a career professional and lasts 20 – 25 minutes. Students will be in small groups and rotate thru each station.

Grants are available for transportation assistance!
