

December 2023

Don't Go Caddyshack!

Keep your fairways pest free with GopherHawk

Oxnard, CA— December 2023— GopherHawk is excited to attend the GCSAA Conference and Trade Show for the first time to share how GopherHawk is quickly becoming the best defense against gophers and moles for golf courses across the nation.

About GopherHawk

Manufactured in the USA, GopherHawk is enjoyed by homeowners, pest control operators and golf courses to efficiently kill gophers and moles with no bait or poison. GopherHawk's unique design solves many of the challenges associated with traditional trapping. GopherHawk is set from above ground with no digging or further disrupting the green. Also, the above ground catch indicator is visible when the trap is activated. The GopherHawk Trapping Set includes all of the tools needed to locate and remove the pest.
