

## **LebanonTurf Receives EPA Registration for Fertilizer with Acelepryn® Insecticide plus Barricade® Herbicide**

New combination products for season-long control of grubs and crabgrass with one fertilizer application.

**LEBANON, Penn.** (December 16, 2025) – LebanonTurf, an industry-leading provider of innovative and high-performance plant nutrition for the golf and landscaping industries, has been granted EPA registration for Fertilizer with Acelepryn® insecticide plus Barricade® herbicide, which provides season-long control of grubs and crabgrass with one fertilizer application.

This unique combination of control products are featured in the Country Club and ProScape brand with the load level combination of **.067% Acelepryn + .67% Barricade**, allowing them to be well suited for any existing maintenance program for both cool-season and warm-season grasses.

"Combining Acelepryn and Barricade together into one product was the next logical step in the growing market of time and labor-saving products that accomplish multiple tasks with one application," said Christopher S. Gray, Sr., Director of Marketing. "These products are a huge time-saver for golf course superintendents and lawn care professionals because they are incredibly effective, highly versatile and easily fit into current, established maintenance programs."

Both Country Club's Acelepryn + Barricade mini-sized products and ProScape Acelepryn + Barricade standard-sized products will feature LebanonTurf's proprietary nutrient technologies of MESA-XP®, a homogeneous granule that contains methylene urea, ammonium sulfate and sulfate of potash, and U-FORM®, urea-formaldehyde nitrogen that feeds the turf for up to 26 weeks.

"We feel that the high caliber of these unique, value-added products demands using the best, most innovative, nutrient components available in the market to deliver the highest quality of fertilizer along with the benefits of season-long insect and weed control," remarked Gray.

For more information about ProScape and Country Club products with Acelepryn and Barricade, visit the [LebanonTurf website](https://www.lebanonturf.com).

### **About LebanonTurf:**

LebanonTurf, a division of privately held Lebanon Seaboard, is the only company serving the landscape and golf markets that offers both microbiological components and advanced controlled-release fertilizers delivered as part of an integrated systems approach to turf and plant care needs.
