

Mighty Plant, Inc. takes the time and labor out of making compost tea in traditional manner of brewing compost. Introducing ***Instant Compost Tea***[™].

It's a water soluble biological powder used as an alternative to traditional brewing of compost tea. This plant amendment contains growth promoting microbes and amino acids found in rich compost that consistently enhances nutrition driven plant growth, yield and quality.

A study was done on Bermuda grass plots to investigate the effect of compost tea applications on overall turf quality. Here we present a summary of the findings: ***Compost tea plots had significantly greater scores and better turf quality ratings across all variables for color, density, uniformity, percent living and texture.***
