

## **Starline Showcases Innovative Power Solutions for Golf Courses at GCSAA 2026**

Delivering Adaptable Power Solutions for the Future of Golf Course Operations

Canonsburg, PA — January 2026 — Starline, a brand of Legrand, and a global leader in power distribution solutions, is excited to announce its first appearance at GCSAA Conference and Trade Show, taking place February 2-5 in Orlando, Florida. The company will showcase its innovative Starline Track Busway, an overhead power distribution system designed to deliver power flexibility and scalability to golf courses for charging golf carts, maintenance tools and vehicles, automated technology, and other electric equipment.

“As courses increasingly adopt electric cart fleets and transition to battery-powered maintenance equipment, legacy facilities are finding their power infrastructure isn’t keeping up,” said Ben Kushner, Product Manager at Starline. “Track busway quickly modernizes power distribution, streamlining operations and keeping pace with the electrification trend.”

Visitors to Booth #1288 will experience firsthand how Starline Track Busway:

- Enhances power infrastructure flexibility for courses currently using or planning to adopt electric equipment.
- Improves operational efficiency and optimizes space in golf facilities.
- Seamlessly incorporates chargers to simplify installation and cord management.

As the golf industry continues to embrace modernization and adopt lithium-ion battery powered carts, course maintenance equipment, and automated caddies, Starline offers a versatile power solution designed for evolving technologies. Attendees are invited to stop by for live demonstration and expert insights into how track busways can transform their facility operations.

### **About Starline**

Starline, a brand of Legrand, is a world-leading provider of flexible power distribution and monitoring solutions. Starline Track Busway provides course operators with a fast and economical solution for supplying and expanding power distribution throughout their facilities.
