

ANDALUSIA, ALABAMA (November 11, 2023) – Turf Pride LLC introduces new and improved roller mowers for professional turf maintenance. Available in 11' 15' and 17' tow behind models and 3-point hitch versions. Features include full width rear roller and front roller for trimming around bunkers and cart paths. The rollers are 33 ½" apart, making them the closest spaced in the roller mower market. The Turf Pride roller mower follows undulation, achieves incredible cut and striping action.

Other unique features include NO TOOLS required height of cut adjustment

"Along with the proven performance, durability and a great history, we are pleased to offer the new and improved roller mower models along with 3-Point hitch versions in 143", 157" and 172".The 157" has an offset hitch providing close cuts around trees and bushes, greatly improving production and reduce the need for string trimmer." said Don Cotton, President of Turf Pride. Choice of colors remains a feature of all rotary mowers manufactured by Turf Pride Mowers; 4 blade selections, fine cut, medium, heavy duty and the Ultra Thatch blades, a new concept in rotary blades with reversible and replaceable blade tips. Finest cut to grass and turning clippings to dust all in one pass.
